PROFILE SUMMARY

Full-Stack Web Developer experienced in building responsive React applications and secure REST APIs with Node.js and Express, backed by PostgreSQL and MongoDB. Skilled in authentication, role-based access control, and deploying web applications used by real users.

EDUCATION

Daffodil International University

2023 – December 2026 (Expected)

B.Sc. in Computer Science and Engineering | CGPA: 3.85 / 4.00

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming (Java), Databases, Operating Systems, Computer Networks, Software Engineering, Artificial Intelligence

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, C/C++, SQL, HTML5, CSS3

Frontend: React, TanStack Query, Recharts, Tailwind CSS, Shadcn UI, Progressive Web Apps (Workbox)

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), Prisma ORM, Spring Boot (training-level)

Databases: PostgreSQL, MongoDB, MySQL

Tools & Services: Git, GitHub, Postman, Firebase (Authentication, Cloud Messaging), Stripe, Cloudinary, Vercel

PROJECTS

Admission Test Management System (Daffodil International University)

Digital platform replacing the manual admission-examination process of the CSE Department, facilitating admission exams for nearly 1,000 students in the latest examination cycle.

- Built and deployed a role-based examination-management system with a university student team, replacing a manual workflow for exam scheduling, candidate management, online examinations, and result publication; faculty-by-faculty rollout is underway across the university.
- My contribution:** Developed and maintained the React-based administrative and candidate portals used by students and exam administrators.
- Integrated the frontend with Django REST APIs for real-time data handling and dynamic content rendering.
- Assisted with VPS deployment, production domain setup and web-server configuration; worked in a team using Git/GitHub.

CampusCart (Daffodil International University)

[Live Site](#)

Live multi-vendor e-commerce and peer-to-peer marketplace for the Daffodil campus community.

- Built three role-based portals (Buyer, Vendor, Admin) with product catalog, cart/checkout, cash-on-delivery, multi-stage order tracking, and classifieds for used items and room rentals.
- Developed 30+ REST APIs with Node.js, Express.js and Prisma ORM on PostgreSQL, implementing JWT authentication, RBAC and transactional order-state transitions.
- Integrated Firebase Cloud Messaging for cross-device push notifications on order and vendor events; implemented a PWA with Workbox service workers for offline caching.
- Automated Cloudinary media uploads with client-side image compression; deployed on a custom domain.

ZapShift

[Live Demo](#)

Parcel booking, delivery tracking and logistics management web application.

- Implemented Firebase authentication (OAuth/email), RBAC (Admin, Rider, User) and parcel status tracking.
- Built delivery-analytics dashboards with React, Recharts, TanStack Query and Tailwind CSS.
- Developed secure REST APIs with Node.js, Express.js and MongoDB, including Stripe payment processing; deployed on Vercel.

Building Management System

[Live Demo](#)

Tenant and rent management web application.

- Implemented JWT authentication, RBAC, tenant CRUD operations and rent tracking.
- Built financial-reporting dashboards with React, Recharts and Tailwind CSS; REST APIs with Node.js, Express.js and MongoDB; deployed on Vercel.

CERTIFICATIONS & ACHIEVEMENTS

- Java Spring Boot Course Certificate – full-stack Spring Boot training with hands-on project work.
- 1st Place, Java course team project – Daffodil International University.
- Solved 300+ problems on Codeforces and LeetCode (Data Structures and Algorithms).
